

California's Historic Drought: The Science and What's Being Done

Join us for an informative evening focused on the local water we all depend on. We will hear from both a leading scientist from UC Davis about our water supply and the dynamic relationship of surface water and ground water, where it is and how it behaves and also from our State Assembly Speaker's office regarding current California legislative developments.

A WATERSHED IN DROUGHT:

UNDERSTANDING GROUNDWATER AND WELLS

Thomas Harter, Ph.D.

Cooperative Extension Hydrologist

Department of Land, Air, and Water Resources, UC Davis

groundwater.ucdavis.edu (see this website for information and a webinar on the subject)

Followed by a brief review of:

RECENT CALIFORNIA LEGISLATION REGARDING GROUNDWATER MANAGEMENT AND REGULATION

Chris Rogers

Senior Field Representative for Assembly Speaker Mariko Yamata

7:00 PM, Monday, November 24, 2014

Middletown Community Center

A public education event sponsored by

The St. Helena Creek Alliance
